- **deh-p4600mp installation manual.**

This manufacturer and the Electronic Industries Association s Consumer Electronics Group want you to get the most out of your equipment by playing it at a safe level. One that lets the sound come through loud and clear without annoying blaring or distortion and, most importantly, without affecting your sensitive hearing. Sound can be deceiving. Over time your hearing comfort level adapts to higher volumes of sound. So what sounds normal can actually be loud and harmful to your hearing. Guard against this by setting your equipment at a safe level BEFORE your hearing adapts. To establish a safe level Start your volume control at a low setting. Slowly increase the sound until you can hear it comfortably and clearly, and without distortion. Once you have established a comfortable sound level Set the dial and leave it there. Taking a minute to do this now will help to prevent hearing damage or loss in the future. After all, we want you listening for a lifetime. We Want You Listening For A Lifetime Used wisely, your new sound equipment will provide a lifetime of fun and enjoyment. Since hearing damage from loud noise is often undetectable until it is too late, this manufacturer and the Electronic Industries Association s Consumer Electronics Group recommend you avoid prolonged exposure to excessive noise. This list of sound levels is included for your protection.<http://iksez.com/v1/PSR/userfiles/ibm-infoprint-1552-parts-manual.xml>

XMwill create and package up to 100 channels of digitalquality music, news, sports, talk and childrens programming.! The XMname and related logos are trademarks of XMSatellite Radio Inc. Attaching the front panel % Replace the front panel by holding it upright to this unit and clipping it securely into the mounting hooks. Protecting your unit from theft The front panel can be detached from the head unit to

discourage theft.! If the front panel is not detached from the head unit within five seconds of turning off the ignition, a warning tone will sound.! You can turn off the warning tone. See Switching the warning tone on page 36. Important! Never use force or grip the display and the buttons tightly when removing or attaching.! Avoid subjecting the front panel to excessive shocks.! Keep the front panel out of direct sunlight and high temperatures. Removing the front panel 1 Press OPEN to open the front panel. 8 En. Also used for controlling functions. 8 BAND button Press to select among three FM and one AM bands and cancel the control mode of functions buttons Press for preset tuning and disc number search when using a multichannel player. To retract VOLUME, press it again. Rotate to increase or decrease the volume.

<http://pedi-bc.com/images/contax-rt3-iii-manuale.pdf>

Press to cycle through all of the available sources. Remote control Operation is the same as when using the button on the head unit. See the explanation of the head unit about the operation of each button with the exception of ATT, which is explained below. En 9 Press once more to return to the original volume level. When you select a source the unit is turned on. Selecting a source You can select a source you want to listen to. To switch to the built-in CD player, load a disc in this unit refer to page 15. % Press SOURCE to select a source. Press SOURCE repeatedly to switch between the following sources Built-in CD player television tuner XM tuner multichannel player external unit 1 External unit 2 AUX % When using the remote control, press TUNER or CD to select a source. Press each button repeatedly to switch between the following sources TUNER XM tuner television Sources off CD Built-in CD player multichannel player Sources off Notes. In the following cases, the sound source will not change When a unit corresponding to each source is not connected to this unit. When no disc is set in this unit. When no magazine is set in the multichannel player. When the AUX auxiliary input is set to off refer to page 36.! External unit refers to a Pioneer product such as one available in the future that, although incompatible as a source, enables control of basic functions by this unit. Two external units can be controlled by this unit. To retract the antenna, turn the source off. Turning the unit off % Press SOURCE and hold until the unit turns off. English En 11 More advanced tuner operation is explained starting on the next page. 1 Band indicator Shows which band the radio is tuned to, AM or FM. 5 To perform seek tuning, press and hold c or d for about one second and release. Seek tuning starts as soon as you release the buttons. Note When the frequency selected is being broadcast in stereo the stereo 5 indicator will light. 2 Frequency indicator Shows to which frequency the tuner is tuned.

<http://clinicafootcenter.com/images/contax-rt3-iii-service-manual.pdf>

3 Stereo 5 indicator Shows that the frequency selected is being broadcast in stereo. 4 Preset number indicator Shows what preset has been selected. 1 Press SOURCE to select the tuner. Press SOURCE until tuner is selected as the source. 2 Use VOLUME to adjust the sound level. Rotate to increase or decrease the volume. 3 Press BAND to select a band. Press BAND until the desired band is displayed, F1, F2, F3 for FM or AM. 4 To perform manual tuning, press c or d with quick presses. The frequencies move up or down step by step. 12 En Note If you do not operate the function within about 30 seconds, the display is automatically returned to the frequency display. Storing and recalling broadcast frequencies If you press any of the preset tuning buttons 16 you can easily store up to six broadcast frequencies for later recall with the touch of a button. % When you find a frequency that you want to store in memory press a preset tuning button 16 and hold until the preset number stops flashing. The number you have pressed will flash in the preset number indicator and then remain lit. The selected radio station frequency has been stored in memory. The next time you press the same preset tuning button 16 the radio station frequency is recalled from memory. Notes! Up to 18 FM stations, 6 for each of the three FM bands, and 6 AM stations can be stored in memory.! You can also use a and b to recall radio station frequencies assigned to preset tuning buttons 16. Tuning in strong signals Local seek tuning lets you tune in only those radio

stations with sufficiently strong signals for good reception. 1 Press FUNCTION to select LOCAL. Press FUNCTION until LOCAL appears in the display. 2 Press a to turn local seek tuning on. Local seek sensitivity e.g., LOCAL 2 appears in the display. 3 Press c or d to set the sensitivity. There are four levels of sensitivity for FM and two levels for AM FM LOCAL 1 LOCAL 2 LOCAL 3 LOCAL 4 AM LOCAL 1 LOCAL 2 English En 13 LOCAL OFF appears in the display.

Storing the strongest broadcast frequencies BSM best stations memory lets you automatically store the six strongest broadcast frequencies under preset tuning buttons 16 and once stored there you can tune in to those frequencies with the touch of a button. 1 Press FUNCTION to select BSM. Press FUNCTION until BSM appears in the display. 2 Press a to turn BSM on. BSM begins to flash. While BSM is flashing the six strongest broadcast frequencies will be stored under preset tuning buttons 16 in order of their signal strength. More advanced CD operation is explained starting on the next page. 1 Play time indicator Shows the elapsed playing time of the current track. 2 Track number indicator Shows the track currently playing. 1 Press OPEN to open the front panel. Playback will automatically start. Pressing c once skips to the start of the current track. Pressing again will skip to the previous track. Notes! The builtin CD player plays one, standard, 12 cm or 8cm single CD at a time. Do not use an adapter when playing 8cm CDs.! Do not insert anything other than a CD into the CD loading slot.! If you cannot insert a disc completely or if after you insert a disc the disc does not play, check that the label side of the disc is up. Press EJECT to eject the disc, and check the disc for damage before inserting the disc again.! If the builtin CD player does not operate properly, an error message such as ERROR 11 may be displayed. Refer to Understanding builtin CD player error messages on page 39.! When a CD TEXT disc is inserted, the disc and track titles begin to scroll to the left automatically. English En 15 RPT ON appears in the display. The track currently playing will play and then repeat. 3 Press b to turn repeat play off. RPT OFF appears in the display. The track currently playing will continue to play and then play the next track. 1 RPT indicator Shows when repeat play is turned on. 2 Function display Shows the function status. % Press FUNCTION to display the function names.

Notes! When playing audio data CDDA, it is not effective even if you turn TAG tag display on. Refer to page 24.! If you do not operate the function within about 30 seconds, the display is automatically returned to the playback display. Playing tracks in a random order Random play lets you play back tracks on the CD in a random order. 1 Press FUNCTION to select RDM. Press FUNCTION until RDM appears in the display. 2 Press a to turn random play on. RDM ON appears in the display. Tracks will play in a random order. 3 Press b to turn random play off. RDM OFF appears in the display. Tracks will continue to play in order. Repeating play Repeat play lets you hear the same track over again. 1 Press FUNCTION to select RPT. Press FUNCTION until RPT appears in the display. Scanning tracks of a CD Scan play lets you hear the first 10 seconds of each track on the CD. 1 Press FUNCTION to select SCAN. Press FUNCTION until SCAN appears in the display. 16 En SCAN ON appears in the display. The first 10 seconds of each track is played. 3 When you find the desired track press b to turn scan play off. SCAN OFF appears in the display. Note After scanning of a CD is finished, normal playback of the tracks will begin again. Pausing CD playback Pause lets you temporarily stop playback of the CD. 1 Press FUNCTION to select PAUSE. Press FUNCTION until PAUSE appears in the display. 2 Press a to turn pause on. PAUSE ON appears in the display. Play of the current track pauses. 3 Press b to turn pause off. PAUSE OFF appears in the display. Play will resume at the same point that you turned pause on. Note You can also turn pause on or off by pressing PAUSE. Using compression and BMX Using the COMP compression and BMX functions let you adjust the sound playback quality of the CD player. Each of the functions have a twostep adjustment. The COMP function balances the output of louder and softer sounds at higher volumes. BMX controls sound reverberations to give playback a fuller sound.

Listen to each of the effects as you select through them and use the one that best enhances the

playback of the track or CD that you are listening to. 1 Press FUNCTION to select COMP. Press FUNCTION until COMP appears in the display. 2 Press a or b to select your favorite setting. ROUGH Searching every 10 track English En 17 When a disc contains a lot of tracks, you can roughly search the track you want to play. 1 Select the search method ROUGH. Also, if the remaining number of tracks after searching every 10 tracks are less than 10, pressing and holding c recalls the first track of a disc. Using disc title functions You can input CD titles and display the title. The next time you insert a CD for which you have entered a title, the title of that CD will be displayed. The disc title will have already been recorded on a CD TEXT disc. 3 Press a or b to select a letter of the alphabet. Each press of b will display a letter in the reverse order, such as Z Y X. C B A order. 4 Press d to move the cursor to the next character position. When the letter you want is displayed, press d to move the cursor to the next position and then select the next letter. Press c to move backwards in the display. 5 Move the cursor to the last position by pressing d after entering the title. When you press d one more time, the entered title is stored in memory. 6 Press BAND to return to the playback display. Notes! Titles remain in memory, even after the disc has been removed from this unit, and are recalled when the disc is reinserted.! After data for 48 discs has been stored in memory, data for a new disc will overwrite the oldest one.! If you connect a multiscd player, you can input disc titles for up to 100 discs. 18 En. The rest of the title will appear in the display. English Using CD TEXT functions Some discs have certain information encoded on the disc during manufacture.

These discs may contain such information as the CD title, track title, artists name and playback time and are called CD TEXT discs. Only these specially encoded CD TEXT discs support the functions listed below. Displaying titles on CD TEXT discs % Press DISPLAY. When the recorded information is longer than 8 letters, you can scroll the text to the left so that the rest of the title can be seen. En 19. Pressing again will skip to the previous track. 20 En. This is particularly the case when playing back multisession and many folders. When being read in, FRMTREAD is displayed.! If you cannot insert a disc completely or if after you insert a disc the disc does not play, check that the label side of the disc is up. Press EJECT to eject the disc, and check the disc for damage before inserting the disc again.! Playback is carried out in order of file number. Press c or d until the desired repeat range appears in the display.! FLD Repeat the current folder. TRK Repeat just the current track. DSC Repeat all tracks Notes 1 RPT indicator Shows when repeat range is selected to current track file. 2 Function display Shows the function status. % Press FUNCTION to display the function names. Note If you do not operate the function within about 30 seconds, the display is automatically returned to the playback display. Playing tracks in a random order Random play lets you play back tracks in a random order within the repeat range, FLD and DSC. 1 Select the repeat range. Refer to Repeating play on this page. 2 Press FUNCTION to select RDM. Press FUNCTION until RDM appears in the display. 3 Press a to turn random play on. Tracks will play in a random order within the previously selected FLD or DSC ranges. 4 Press b to turn random play off. English Scanning folders and tracks While you are using FLD, the beginning of each track in the selected folder plays for about 10 seconds. When you are using DSC, the beginning of the first track of each folder is played for about 10 seconds.

1 Select the repeat range. Refer to Repeating play on the previous page. 2 Press FUNCTION to select SCAN. Press FUNCTION until SCAN appears in the display. 3 Press a to turn scan play on. SCANON appears in the display. The first 10 seconds of each track of the current folder or the first track of each folder is played. 4 When you find the desired track or folder press b to turn scan play off. Notes! After track or folder scanning is finished, normal playback of the tracks will begin again.! If you turn scan play on during FLD and then return to the playback display, FSCN appears in the display. 1 Press FUNCTION to select PAUSE. When the one folder contains a lot of tracks, you can roughly search the track you want to play. 1 Select the search method ROUGH. Also, if the remaining number of tracks after searching every 10 tracks are less than 10, pressing and holding c recalls the first track of the folder. Press FUNCTION until TAG appears in the display. 2 Press a to

turn tag display on. TAGON appears in the display. 3 Press b to turn tag display off. TAGOFF appears in the display. Note When you turn the tag display on, this unit returns to the beginning of the current track in order to read the text information. Scrolling text information in the display This unit can display the first 8 letters only of FOLDER, FILE, TRK TTL, ART NAME, ALBM TTL and COMMENT. When the recorded information is longer than 8 letters, you can scroll the text to the left so that the rest of the text information can be seen. % Press DISPLAY and hold until the text information begins to scroll to the left. The rest of the text information will appear in the display. En 25 26 Section 07 MultiCD Player Playing a CD You can use this unit to control a multacd player, which is sold separately. These are the basic steps necessary to play a CD with your multacd player. More advanced CD operation is explained starting on the next page. 1 Disc number indicator Shows the disc currently playing.

2 Play time indicator Shows the elapsed playing time of the current track. 3 Track number indicator Shows the track currently playing. 1 Press SOURCE to select the multacd player. Press SOURCE until multacd is selected as the source. 2 Use VOLUME to adjust the sound level. Rotate to increase or decrease the volume. 4 To perform fast forward or reverse, press and hold c or d. 5 To skip back or forward to another track, press c or d. Pressing d skips to the start of the next track. Notes! When the multacd player performs the preparatory operations, READY is displayed.! If the multacd player does not operate properly, an error message such as ERROR11 may be displayed. Refer to the multacd player owners manual.! If there are no discs in the multacd player magazine, NO DISC is displayed.! When you select a CD TEXT disc on a CD TEXT compatible multacd player, the disc and track titles begin to scroll to the left automatically. 50disc multacd player Only those functions described in this manual are supported for 50disc multacd players. 3 Select a disc you want to listen to with the 16 buttons. For discs located at 1 to 6, press the corresponding number button. Press c or d until the desired repeat range appears in the display.! MCD Repeat all discs in the multacd player. DSC Repeat the current disc English 1 RPT indicator Shows when repeat range is selected to current track. 2 Function display Shows the function status. % Press FUNCTION to display the function names. Repeating play There are three repeat play ranges for the multacd player MCD multacd player repeat, TRK onetrack repeat and DSC disc repeat. 1 Press FUNCTION to select RPT. Playing tracks in a random order Random play lets you play back tracks in a random order within the repeat range, MCD and DSC. 1 Select the repeat range. Tracks will play in a random order within the previously selected MCD or DSC ranges. 4 Press b to turn random play off.

En 27 28 Section 07 MultiCD Player Note If you turn random play on during DSC and then return to the playback display, DRDM appears in the display. Scanning CDs and tracks While you are using DSC, the beginning of each track on the selected disc plays for about 10 seconds. When you are using MCD, the beginning of the first track of each disc is played for about 10 seconds. 1 Select the repeat range. The first 10 seconds of each track of the current disc or the first track of each disc is played. 4 When you find the desired track or disc press b to turn scan play off. Notes! After track or disc scanning is finished, normal playback of the tracks will begin again.! If you turn scan play on during DSC and then return to the playback display, DSCN appears in the display. Using ITS playlists ITS instant track selection lets you make a playlist of favorite tracks from those in the multacd player magazine. After you have added your favorite tracks to the playlist you can turn on ITS play and play just those selections. Creating a playlist with ITS programming You can use ITS to enter and playback up to 99 tracks per disc, up to 100 discs with the disc title. With multacd players sold before the CDXP1250 and CDXP650, up to 24 tracks can be stored in the playlist. 1 Play a CD that you want to program. Press a or b to select a CD. 28 En 29 MultiCD Player Section 07 2 Press FUNCTION and hold until TITLE IN appears in the display, then press FUNCTION to select ITS. After TITLE IN is displayed, press FUNCTION repeatedly, the following functions appear in the display TITLE IN disc title inputits ITS programming 3 Select a desired track by pressing c or d. 4 Press a to store the currently playing track in the playlist. ITS IN is displayed briefly and the

currently playing selection is added to your playlist. The display then shows ITS again. 5 Press BAND to return to the playback display.

Note After data for 100 discs has been stored in memory, data for a new disc will overwrite the oldest one. Playback from your ITS playlist ITS play lets you listen to the tracks that you have entered into your ITS playlist. When you turn on ITS play, tracks from your ITS playlist in the multichannel player will begin to play. 1 Select the repeat range. Refer to Repeating play on page Press FUNCTION to select ITSP. Press FUNCTION until ITSP appears in the display. 3 Press a to turn ITS play on. ITSPON appears in the display. ITSPOFF appears in the display. Playback will continue in normal order from the currently playing track and CD. Erasing a track from your ITS playlist When you want to delete a track from your ITS playlist, you can if ITS play is on. If ITS play is already on, skip to step 2. If ITS play is not already on, press FUNCTION. 1 Play a CD you want to delete a track from your ITS playlist, and turn ITS play on. Refer to Playback from your ITS playlist on this page. 2 Press FUNCTION and hold until TITLE IN appears in the display, then press FUNCTION to select ITS. After TITLE IN is displayed, press FUNCTION until ITS appears in the display. 3 Select a desired track by pressing c or d. 4 Press b to erase a track from your ITS playlist.
